ABOUT ME

Motivated B.Tech Computer Science & Technology student with hands-on experience in web development and hackathon projects. Skilled in frontend technologies and currently building expertise in the MERN stack. Seeking a campus placement opportunity to apply programming and development skills, solve real-world problems, and grow as a software developer.

EDUCATION

Bachelor of Technology | Computer Science & Technology

MDU University | 2024 – 2028 | CGPA: 7.6

Class XII

R.B. Public School | 2023 – 2024

PROJECTS & EXPERIENCE

Automated Attendance System for Rural Schools

Frontend Developer | Hackathon Project

- Developed the frontend concept for an automated attendance management system for rural schools.
- Designed a workflow incorporating QR scanning, attendance verification, database storage and parent notifications.
- Collaborated with a multidisciplinary student team and focused on a simple, user-friendly interface.

Technologies: HTML, CSS, JavaScript, React.js

ScanTrack — Receipt Tracker

- Designed a digital receipt management concept using the MERN stack.
- Planned backend functionality with Node.js and Express.js and MongoDB for data storage.
- Explored OCR-based receipt data extraction using Tesseract.

Technologies: React.js, Node.js, Express.js, MongoDB

Flipkart Clone

- Built a frontend e-commerce website inspired by an online shopping platform.
- Created webpage layouts, product sections and styling using HTML and CSS.

Technologies: HTML, CSS

SKILLS

Python

JavaScript

MERN Stack
